

# ANTI-VAX CONSPIRACY DEBUNKER (AI CHATBOT)

Using **Hazlo** and **Snatchbot** to identify and answer misconceptions about the Covid-19 vaccine

August 2021

# IDENTIFYING THE QUESTION

- Various conspiracy theories and rumors about vaccines have led to low vaccination rates in many countries
- Impact on the global fight against the new coronavirus
- False information everywhere, and it is difficult to analyze it all
- It is necessary to use AI to identify false information and answer questions

Sub-themes	Operational definitions
Vaccine development, availability, and access	Reports of rumors and conspiracy theories related to the policy, progress, and challenges of COVID-19 vaccine trial, phases of trials, trial participants and development were included under this category. This also includes past and ongoing availability of COVID-19 vaccines, it's delivery and public access to them [34].
Safety, efficacy, and acceptance	Claims related to the safety and efficacy of COVID-19 vaccine and its acceptance
Political and economic motives	The political and economic interest of COVID-10 vaccines and its development [34].
Conspiracy theory	Claims and discussion of various theories related to the COVID-19 vaccine and its malicious goals
Mandatory vaccine and ethics	Claims related to concerns about mandatory vaccine and ethics.
Vaccine reagents	Claims pertaining to concerns about what materials have been used in vaccine
Morbidity and mortality	Posts containing claims about morbidity and mortality due to participation in vaccine trials or receiving vaccine in future
Vaccine alternatives	Content related to the alternative options to vaccine
Susceptibility due to other vaccine exposure	State or claims related to exposures to other vaccine and vulnerability to COVID-19
Miscellaneous	Statements, claims and discussion that did not fit to the above sub-themes

## DEFINING THE QUESTION

- This project aims to allow users to check the **authenticity** of rumors regarding the new vaccine, identifying the 7 different types of rumor being queried:
  1. The coronavirus does not exist, and the infection and fatality rate are low ;
  2. Vaccines aim to reduce earth's population ;
  3. The vaccine is not effective ;
  4. The mRNA vaccine will be harmful to the human body and change its gene ;
  5. The long-term adverse effects of vaccine ;
  6. Infections are prone to occur after successive vaccinations ;
  7. Herd Immunity is more effective than vaccines.
- The system will then attach the corresponding **answers and information**

- Correspond social media messages (and some self-generated) messages to seven types of rumors, and attach labels ;
- Using Hazlo as machine learning tools.

- Snatchbot system

The screenshot displays the SnatchBot web interface. On the left is a sidebar menu with options: Dashboard, My Bots, Build (highlighted), Persistent Menu, Global Connections, Channels, Configure, Plugins, Automation Flows, Broadcast, Inbox, and Reports. The main area is divided into two panels. The left panel shows a list of bot interactions with titles like 'New interaction', 'vaccine efficacy', 'depopulation' (highlighted), 'long term', 'breakthrough infecti...', and 'covid is fake'. The right panel shows a detailed view of the 'depopulation' interaction, including a 'Bot Message' section with a text response and a 'Text-to-Speech' section with 'Off', 'Manual', and 'Auto' buttons.

- Snatchbot system

The screenshot displays the SnatchBot web interface. On the left is a sidebar menu with options: Dashboard, My Bots, Build (highlighted), Persistent Menu, Global Connections, Channels, Configure, Plugins, Automation Flows, Broadcast, Inbox, and Reports. The main area is divided into two panels. The left panel, titled '191610 why you should get vaxxed', lists several bot statements: 'New interaction Bot Statement (2731866)', 'vaccine efficacy Bot Statement (2731869)', 'depopulation Bot Statement (2731867)', 'long term Bot Statement (2731889)', 'breakthrough infecti... Bot Statement (2731890)', and 'covid is fake'. The right panel shows the configuration for a 'New interaction' (ID 2731866) updated on 02 Aug 6:23. It features a 'Test chat' toggle and a 'Bot scheme' button. Below these are five logic rules, each starting with 'If Response to this interaction contains (any part)'. The rules are: 1) 'pfizer vp' leads to 'depopulation' and 'kill'; 2) 'exaggerated +1' leads to 'covid is fake'; 3) 'effectiveness +1' leads to 'vaccine efficacy'; 4) 'mRNA' leads to 'mRNA'; 5) 'Long term' leads to 'months'. Each rule has a trash icon for deletion.

why you should get vaxxed

HI, want to know more about vaccine conspiracy and why they are false? Type your question below!

Aug 3, 2021, 4:23:53 AM

someone claims that vaccines have low protection ability, is this true?

Aug 3, 2021, 4:24:22 AM

It seems that you have questions about vaccine efficacy, here is more information : [url=https://www.yalemedicine.org/news/covid-19-vaccine-comparisonLABEL\_URL[/url]]

# RESULTS

- This AI model has the following deficiencies :
  - 1. Insufficient training data makes the prediction less accurate;
  - 2. Failure to solve problems such as typos and emoticons instead of words;
  - 3. If the query has nothing to do with the epidemic or vaccines, the system will still give the analysis results ;
  - 4. The system does not perform back propagation to adjust parameters to automatically improve the recognition effect.
- There are 3 solutions :
  - 1. Add vaccine-related training data from different dates and groups, such as messages using synonyms ;
  - 2. Add messages in different languages, different "typing" methods and different alternative emoticons to make the training effect more accurate ;
  - 3. Add other or irrelevant classification options.

Not enough  
time and data
